

How to become a part of the

Why?

Demand for STEM professionals and associated professionals is expected to grow by around 8% between now and 2025. Europe needs more young people to pursue STEM subjects and careers to become a part of a much-needed qualified workforce for the success of the European economy. **All industrial sectors need qualified STEM professionals** to boost the pace of innovation, employment and productivity and consequently, Europe's ability to compete globally. We need **motivated, properly trained, well-equipped STEM teachers** to prepare and inspire Europe's next generation of researchers and industry professionals. Building upon the work of the inGenious platform, the STEM Alliance tackles those fundamental societal challenges through the **support of industry partners and Ministries of Education** across Europe.

What?

Since its launch, **STEM Alliance** has reached more than 10,000 pupils and hundreds of teachers and companies from all over Europe. This has been achieved through a variety of activities that bring industry and education closer together around three main axes of activities (find out more in the **STEM Alliance video**):

Supporting **Teachers and Industry**: e.g. the **Teacher Discovery Placement scheme**; the **STEM Professionals go Back to Schools scheme**, and the **STEM-π assessment tool** to support companies to assess the potential impact of their STEM activities.

Communication and Outreach with **European campaigns**: **STEM Discovery Week** (24-30 April each year] and a **Back to School Campaign** (autumn) and **high-level events**.

Scaling up through knowledge-building and collaboration: Activities to provide extensive, **evidence-based analysis**, on strategic STEM education issues: "**STEM Alliance Knowledge Observatory of STEM Trends in Education**" and advocacy to attract all industry sectors in the STEM Alliance and support national initiatives.

Who?

COORDINATORS

PREMIUM PARTNERS

GENERAL PARTNERS

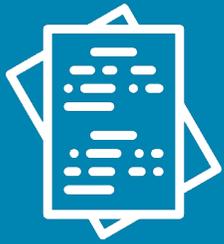

The STEM Alliance is coordinated by both **European Schoolnet** and **CSR Europe**. The STEM Alliance is supported by a core group of Premium partners and of general partners. The activities are accessible to as many partners as possible.

HOW CAN IT BENEFIT MY BUSINESS?

Contribute to boost innovation in industry

Prepare the much-needed qualified workforce for Europe's future economy.

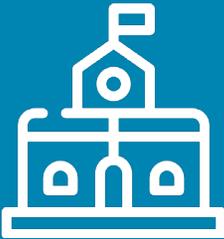

Access a policy platform

Access a policy platform of Ministries of Education and companies.

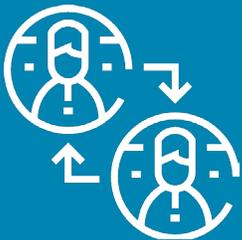

Get European visibility

Achieve European prominence by being included in a multi-stakeholder platform.

Connect with Schools

Enrich your strategy to reduce the STEM skills gap & to support STEM education connecting with schools.

Promote Business/Education collaboration

The STEM Alliance provides a central place for the promotion of Business/Education in STEM Education.

Read more here on the benefits of joining the STEM Alliance.

HOW CAN I GET INVOLVED?

The STEM Alliance offers new partners an opportunity to reinforce the links between STEM education and STEM careers. Numerous partners from the private sector are already engaged.

Join either as a:

- **Premium partner** to **enjoy widespread visibility** in all our communication channels. You will also be **in the driving seat**, part of the governing body of the Alliance with the **power to set the strategic direction**.
- **General partner** to be branded as partner in our communication channels and bring in your ideas to the governing body. You will be able to **participate in most events and activities** organised by the STEM Alliance.
