

The [STEM Alliance](#) is an **international initiative**, coordinated by [European Schoolnet](#) (the network of 32 European Ministries of Education), that brings together **industries, education stakeholders and Ministries of Education** to promote **STEM education and careers** to young Europeans and to address anticipated future skills gaps within the European Union.

The STEM Alliance departed from the observation that there is a **lack of skilled STEM workers** in Europe which hinders **innovation**. This trend is intensified by demographic transformations, lack of interest and low performance in STEM subjects, wide-spread digital skills shortage and an urging necessity to address global challenges like climate change, mobility and energy. To tackle these issues, the STEM Alliance gathers **16 frontline industry Partners** in concerted actions to:

Make **STEM subjects and careers** more attractive and explore and support **innovative practices in STEM teaching**

STEM ALLIANCE ANNUAL REACH

16 INDUSTRY PARTNERS

1,000+ ACTIVITIES

7,000+ SCHOOLS

15,000+ TEACHERS

122,000+ STUDENTS

AS THE STEM ALLIANCE INDUSTRY PARTNER YOU WILL:

- Be at the **frontline of European and global companies** that have realised the need to tackle the STEM skills gap.
- Benefit from the **wide-reaching STEM Alliance network** that brings together key education, policy and industry actors.
- Boost your **company's visibility** effectively at European level in STEM-related media outputs.
- Initiate concrete **activities and campaigns** targeted at teachers and students across Europe conducted with the STEM Alliance.
- Gain access and contribute to STEM Alliance **knowledge, research papers and reports**.
- Shape Europe's STEM discourse** by discussing best practices in topic-specific workshops, webinars and high-level events.
- Enable your business to further **develop partnerships** with education stakeholders on local, national and European levels.
